Birds of Maui.

*Larus barrovianus*.  
.. *californicus*.  
.. *delawarensis*.  
.. *franklinii*.

*Sterna fuliginosa*.

*Puffinus newelli*.

*Phaethon lepturus*.

*Fregata aquila*

*Anas wyvilliana*

*Charadrius albeola*

*Spatula clypeata*

*Lafila acuta*

*Chen hyperboreus*

*Branta nigricans*

*Nycticorax nycticorax naevius*.

*Gallinula sandwicensis*.

*Fulica alai*

*Corymophilus fuscicarius*

*Himantopus knudseni*

*Zingon acuminata*

*Heteractitis incanous*.

*Limosa lapponica barum*

*Calidris acensaria*

*Numenius tahitiensis*

Field and Working Notes on The Birds taken  
on the Island of Maui

By Chester E. Blacow.

---

The following facts are to be observed of  
every bird and species taken, if possible  
when collecting, etc.

1. The style of bird taken, young or old.

a. Name

(b) measurements etc.

2. Habits of the birds in their native  
haunts.

a (actions), b (what they do when  
hunting for food), c (whether they haunt  
tall or low trees), d (open places or thickly  
wooded places), e (and any other action or  
habit.)

3. Food. What kind, Where found. Whether  
plentiful or scarce. A description of their

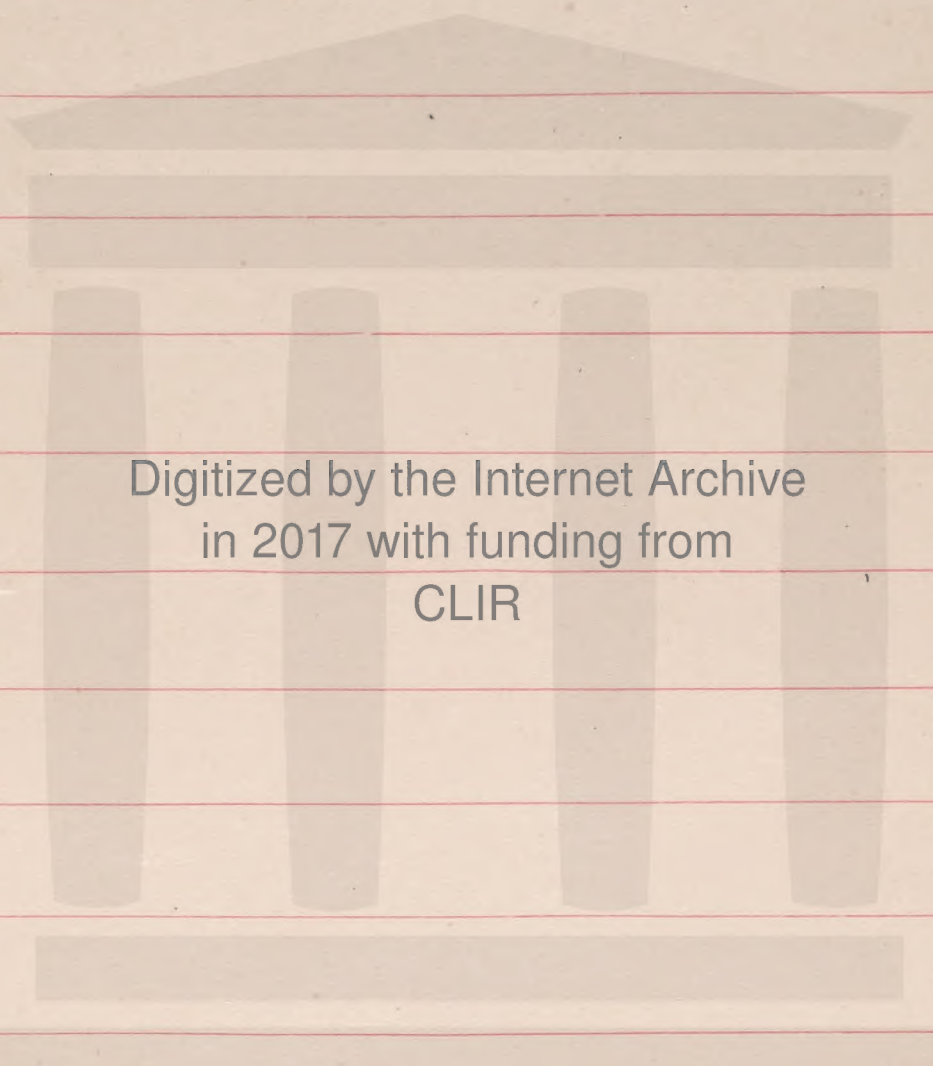

food.

4. Actions when eating, etc.

5. Date and locality of observation, elevation,  
and on what part of the island they are found.

6.

B.1. Length 12.70 wing tail  
tarsus toe, culmen

Depth of beak. Female, Dec 17, 03  
at 1800 foot elevation in low Chea  
trees about 15 ft. high, at 12:10 P.M.

Found above Kaantapali on SW part  
of Mani. Near W.Y. Hone's mountain  
house.

B.2. Length 11.50 cm. Wing 6.50 cm.

Found on ridge on which W.Y. Hone's  
mountain house is situated, at about 1800  
foot elevation, above Kaantapali, Mani,  
on Dec. 17, 1903.

B. 3. Length wing. tail  
tarsus culmen Depth of beak  
thickness or width of beak, to

Found as above on Dec. 17. 1903.

B. 4. Length 11.30 wing 6.23 tail

tarsus. culmen toe

Depth of beak width of beak,

Female, Found above Kaanapali,

Main, on SW part of island at 1800 ft  
elevation, on Dec. 17. 1903. In full song.

Chlorodrepanis wilsoni. Feeding off of

bugs on low Ohia trees. On same

ridge as W. G. Homer's mountain house  
is situated.

B. 5. Length 11.40 wing 6.40 tail  
to culmen tarsus

Depth of beak, width of culmen

Found near the head of the Oolawa  
Gulch, Maui, December 18, 1903; at <sup>250</sup> 250 ft.  
elevation (about). Feeding on Scaevola  
bushes, on the worms that live on the bushes.

Female. *Chlorodrepanis wilsoni*.

Ovaries small, and bird in full attire, as  
to full plumage doubtful. At the lower edge  
of the woods in slow trees and shrubs.

B. 6. Length 12 cm wing, 6.30. Found at  
1800 foot elevation above Kaanapali, Maui on  
Dec. 21, 1903, on ridge to the eastward of W. G.

Homer's mountain house I full song. Male

*Chlorodrepanis wilsoni*. Testicles enlarged

Also saw a bird, which I am sure  
is a *Pseudonotus pectoratorius*, shot  
at it but did not get it. (Oowala Gulch)

B. 7 . Length wing .

Found at same place as B. 6 .
